

This tutorial will show how to download and install VMware View Client on a Windows operating system (PC) to access SPSS remotely

Step One

Determine whether you are using a 64 or 32-bit operating system:

1. Click the **<u>Start Menu</u>**.

2. Right click <u>Computer</u> and choose <u>Properties</u>.

3. If "64-bit Operating System" is listed next to System type, you're running the 64-bit version of Windows.

If "32-bit Operating System" is listed next to System type, you're running the 32-bit version of Windows.

## Step Two

Download and install the appropriate VMWare view client for your Operating System. Choose one of the links below:

- o 64-bit Operating System: Download VMWare View Client 64-bit Windows
- o 32-bit Operating System: <u>Download VMWare View Client 32-bit Windows</u>
- **NOTE**: If you attempt to install the wrong installer (64-bit or 32-bit) you will receive an error stating it is the wrong version for your Operating System. If this occurs simply choose to download the other installer.

1. Once the installation process begins, click <u>Next</u>.

2. <u>**Read**</u> and <u>**accept**</u> the terms in the License Agreement and then click <u>**Next**</u>.
